# How to use the Arts Integration & STEAM Implementation Scorecard

1. For each of the 9 sections in the outer circles on the Venn diagram, look at the corresponding boxes below.
2. Read each of the characteristics in the box. Red = basic level. Yellow = intermediate level. Green = Advanced level.
3. For each color/level, consider which statement is happening for you on a consistent basis (more than 85% of the time).
4. Select your level (red, yellow, or green) and then place that color in the blank box in the corresponding section in the Venn diagram.
5. Do this for each section around the Venn diagram.
6. Use your reds and yellows to identify where your immediate needs are for arts integration and STEAM implementation. Greens show you areas where you are excelling and should continue to support.

Our certified arts integration specialist team can help you guide these efforts and create a personalized plan for moving from reds and yellows to greens. We do this within our highly-rated Accelerator platform.
